

NATALIE BARNETT

Natalie Barnett works at Sandia National Laboratories as an international biosecurity systems analyst.

She is a Senior Member of the Technical Staff with degrees in Psychobiology (BS from the University of California), and in Computer Information Systems (MS from the University of Phoenix).

She is currently working with federal agencies in the US and with international counterparts on the issues surrounding the protection of high consequence pathogens and toxins from theft and sabotage.

Her work includes developing a quantitatively based methodology for assessing security risks at biological facilities; performing security risk, threat and vulnerability analyses; designing biosecurity systems; overseeing implementation of these systems; writing and implementing biosecurity policies and procedures.
