

IMLASS Timetable

The application will be created in the following stages:

Version 1 (Beta)

Description	Target/Status
Creation of the web service documentation (XML schema and Web Service definitions, aka WSDL).—	Accomplished
Creation of the formatted message visual elements (what the User will see with regards to the menus and the form)	
Creation of autonomous database	
Search result display designed.	October
Integration of an ICIS search engine which produces compiler-verified results to Users	November
Draft versions of Pop-ups, Online Tutorial and User's Manual completed.	
4 Language Message capability added	December - January 2007
i2 Visualization added for summary page	
Creation of an interface to allow "batch dumping" of Excel spreadsheets directly into the system.	
Edit/Delete option available through compiler	
Advisory Group Meeting at Interpol GS in Lyon	
Testing with pilot FIUs and NCBs. Feedback from all pilot site Users will be incorporated into application. The pop-ups, tutorial and manual will be finalised during this period.	February

Version 2 (March – June 2007)

- i2 Visualization incorporated into search results
- Edit/Update Previous Inquiries options enabled
- Ability to accept Arabic characters for individual and company names and addresses (only exact matches returned as positive)

- Address search engine & result added
- Phonetic searches on names of individuals in all languages but Arabic

Version 3 (July – December 2007)

- Full i2 visualisation capabilities realised.
- Names in Arabic characters are automatically transliterated into the top 3 spellings and placed directly into the form. (this will facilitate the search)
- Transliterated Arabic phonetic search performed
