## About I-Learn

**I-Learn** is your access point platform to the **Virtual Academy**, the digital learning solution of the **INTERPOL Global Academy**, that brings together a range of digital learning products under one umbrella, thereby facilitating global law enforcement training and collaboration among its member countries. By doing so, it provides a comprehensive digital learning environment that supports the professional development of law enforcement personnel worldwide.

I-Learn is a specific platform dedicated to digital training, offering a diverse array of learning formats to cater to different needs and preferences. These include self-paced eLearning, which allows users to learn at their own pace, Small Private Online Courses (SPOCs) that provide more personalized online learning experiences, educational webinars, and podcasts.

It is open to law enforcement officials from INTERPOL Member Countries and selected partners. **Please note that it is the INTERPOL National Central Bureau of your country who is responsible for approving and creating user accounts.**

**Please contact your INTERPOL National Central Bureau through official channels available to you as a law enforcement officer to request access to the learning platform.**

# Training Modalities

The I-Learn platform provides digital training for law enforcement officers in our member countries. Aimed at both new and experienced officers, it offers instructor-led courses as well as self-paced training, reaching those who most need it when they need it.

Self-paced eLearning offers the flexibility to progress through educational materials at your own pace and convenience, allowing you to study and complete assignments or modules independently. The courses vary in length and the number of modules they include, and some offer downloadable certificates of completion.

We offer both live webinars and recordings, ensuring learners have access to high-quality educational content that supports their professional development and learning goals. Our live webinars feature world-renowned experts in their respective fields, providing valuable insights and opportunities for interactive learning. This combination of live and recorded sessions helps learners stay informed about the latest trends and advancements in various industries.

Podcasts cover diverse themes and feature insights from INTERPOL experts, case studies, and discussions with leading figures in law enforcement. Since these are released periodically, we encourage the users of the platform to stay tuned for the latest episodes.

Small Private Online Courses, or SPOCs, are smaller, more personalized courses compared to traditional Massive Open Online Courses (MOOCs). Participants can closely engage with course material and instructors, and progress through the material at their own pace, accessing course content and completing assignments according to their schedule. Additionally, participants may have opportunities for real-time interaction with instructors and peers through discussion forums, live sessions, or virtual office hours. SPOCs are delivered at the initiative of specialized INTERPOL units and facilitated by the INTERPOL Capacity Building and Training Directorate.

Languages available:

**EN** = English, **FR** = French, **SP** = Spanish,  
**AR** = Arabic, **RU** = Russian, **IT** = Italian,  
**PT** = Portuguese

Certificates:

 = training course with a certificate completion (self-paced)  
 = training course with a certificate of successful completion
