## Global DNA Profiling Survey Results 2016

## TABLE OF CONTENTS

Summary of results .....	2
List of INTERPOL member countries that use DNA profiling in criminal investigations.....	3
List of INTERPOL member countries with a national DNA database .....	4
Survey results table: Africa.....	5
Survey results table: Americas.....	7
Survey results table: Asia & South Pacific .....	9
Survey results table: Europe .....	11
List of INTERPOL's 190 member countries and responses .....	13

## Summary of results

Every two years, INTERPOL conducts a global DNA profiling survey to monitor the use of DNA profiling and DNA databases in countries.

In January 2017, INTERPOL's 190 National Central Bureaus were asked to provide their national DNA statistics as of the end of 2016. The results are as follows:

- **95** (50%) member countries responded to the 2016 Survey, of which:
  - **84** member countries reported using DNA profiling in police investigations,
  - **69** member countries reported having a national DNA database (a centralized searchable repository),
  - **73** member countries reported using Y-STR analysis,
  - **31** member countries reported using mitochondrial DNA analysis,
  - The estimated global total of DNA profiles reported by member countries and member countries' overseas sub-bureaus is **35,413,155** DNA profiles.

These numbers reflect the redactions requested by member countries.

NB: If you wish to modify your country statistics, please inform the INTERPOL DNA Unit via your country's INTERPOL National Central Bureau.

**84 INTERPOL member countries that use DNA profiling in criminal investigations  
(as of end of 2016)**
