

> **PROVIDING INTERPOL WITH SECURE TRAVEL DOCUMENTS**

Morpho was chosen for the INTERPOL Travel Document initiative to deliver a complete identity management solution. (MorphoCIVIS™ Software Suite) Morpho will manage the issuance of highly secure travel documents (e-Passports and e-ID cards) to INTERPOL's members. This includes multi-biometric data enrollment, identity checks, document personalization and production.

The travel documents will integrate state-of-the-art security features, including 3D Photo ID™, a three-dimensional laser-engraved portrait of the document holder which is clearly visible without the use of any special equipment. 3D Photo ID™ helps to tackle document fraud as any attempt to forge the document by changing the portrait is immediately noticeable. Morpho brings unrivalled levels of quality, reliability and security to travel documents.

Morpho has delivered more than 300 million secure ID documents to date within 100 identity management programs for both public and private sector customers worldwide. With its solid expertise in identity management, biometrics, smart cards and secure printing, the company is equipped to provide INTERPOL with state-of-the-art travel documents which meet the industry's highest security standards.

Uniquely positioned as the worldwide leader in biometric technology (iris, fingerprint and facial recognition), Morpho provides products and services covering the entire secure spectrum of secure credentialing, including enrollment, identity verification, identity database management, document production and issuance and document authentication. Governments across the world have chosen Morpho to supply their highly secure identification documents: e-ID cards, e-Passports, driver licenses, biometric visas, voter IDs and health cards. By combining proven expertise with innovative technologies, Morpho helps to protect and secure identities.

> **ABOUT MORPHO**

Morpho, a high-technology company in the Safran group, is one of the world's leading suppliers of identification, detection and e-document solutions. Headquartered in Paris, France, it employs over 7,500 employees in over 40 countries. Morpho creates trust worldwide by delivering innovative security solutions to governments, police and border agencies, administrations and businesses for a wide range of applications including aviation security, electronic document issuance, biometric identification, access control and road safety. Morpho's integrated systems and equipment are deployed worldwide and contribute to the safety and security of transportation, data, people and countries.
