

950

It is recommended that strong moisture resistant labels are used for victim recovery. The labels below are for emergency use; if they are used they should be cut out and protected in strong clear plastic. Type the country code and unique reference number into the first boxes below this text, this number will automatically populate through the entire form. Ensure that the unique reference number is issued only once. The scene reference box is optional, for use where there are multiple disaster scenes. Print off the pages then complete further details in clear handwriting.

Post Mortem PM	DVI Team Country Code	Unique Reference Number	Scene Reference (If Required)
